

AVICENNA INTERNATIONAL MEDICAL UNIVERSITY(AIMU)

Bishkek *Kyrgyzstan*

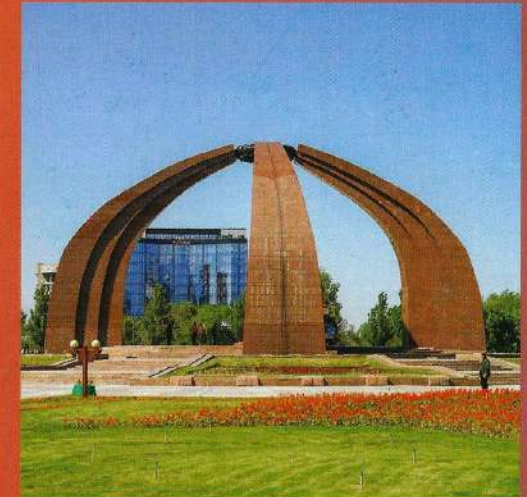

KYRGYZSTAN OVERVIEW

History

The history of the Kyrgyz in what is now Kyrgyzstan dates at least to the 17th century. Kyrgyzstan, known under Russian and Soviet rule as Kirgiziya, was conquered by tsarist Russian forces in the 19th century. Formerly a constituent (union) republic of the U.S.S.R., Kyrgyzstan declared its independence on August 31, 1991, Kyrgyz history can be traced at least to the 1st century BCE. The probable abodes of the early Kyrgyz were in the upper Yenisey River valley of central Siberia, and the Tashtyk culture (1st century BCE-5th century CE), an amalgam of Asiatic and European peoples, may have been theirs.

Kyrgyzstan's recorded history spans over 2,000 years, encompassing a variety of cultures and empires. Although geographically isolated by its highly mountainous terrain, which has helped to preserve its ancient culture, Kyrgyzstan has been at the crossroads of several great civilizations as part of the Silk Road and other commercial and cultural routes.

Location, Geography and Culture

Kyrgyzstan has an area of 76,500 square miles (198,500 square kilometers). Its neighbors are China to the southeast, Kazakstan to the north, Tajikistan to the southwest, and Uzbekistan to the northwest. The valleys are densely populated along the few paved roads. Northern Culture has been influenced by Russians, while southern culture has absorbed Uzbek traditions, The Naryn region in central Kyrgyzstan is relatively isolated, and it is here that the Kyrgyz culture is most "pure."

As nomads, the Kyrgyz people always lived closely with nature. From their housing to their clothing, everything was designed to adapt to changing weather and locations. Yurts are easy to take apart and carry, and can be made warmer for winter, and cooler for summer. The textiles inside of yurts, such as shyrdaks and tush kyiz (felt rugs and embroidered hangings), take their inspiration from designs found in nature, such as plants, animals, and landscapes. Even clothing was made out of natural materials, and designed to be comfortable while still stylish.

AVICENNA OVERVIEW

Avicenna Overview

Rector's Message

Rector's Message

Our University holds in high regard the promotion of virtuous ideals and the concept of whole person education, while being committed to the implementation of professional education and the development of academic research. It also focuses on cultivating high quality talent with both ability and integrity, to accord with the development of globalization in science, technology and economy.

Our educators hold fast to the belief that the University is not just simply a place to teach professional knowledge and develop professional skills; rather it is more akin to a place which promotes thinking and wisdom, purifies souls, and passes on traditions of outstanding cultural and humanistic spirit. Today, the global higher education environment is developing rapidly, with the continuous prosperous progress of Kyrgyz society and economy, the present offers an excellent opportunity to take the initiative in promoting higher education development.

To meet upcoming challenges and opportunities, we will continue to implement strategies of pursuing excellence in teaching and research with equal importance, establishing and furthering our bases in local society whilst maintaining an international outlook. We will accelerate the progress of internationalization of the University, solicit talent and build up high quality academic teams with international experience and multi-disciplinary backgrounds to provide high quality education and deepen inter-discipline and innovation.

A.T. BAIGAZAKOV
Rector
Avicenna International
Medical University (AIMU)

Vice Rector's Message

Vice Rector's Message

As the Vice Rector of our esteemed medical university, I am honored to address each and every one of you with a heartfelt message. First and foremost, I want to express my sincere appreciation for your dedication, hard work, and passion in pursuing a career in medicine. You have chosen a noble path that requires immense commitment, sacrifice, and continuous learning.

Our university stands as a beacon of excellence, and our mission is to shape exceptional medical professionals who will make a positive impact on society. I am immensely proud of the strides you have made in your studies and the progress you have shown in your practical skills. Each day, you are moving closer to becoming the compassionate healers and caretakers that our world desperately needs.

I understand that the journey of medical education is not without its challenges. The rigorous curriculum, demanding schedules, and the weight of responsibility can at times be overwhelming. Please remember that you are not alone in this endeavor. Our faculty members and staff are here to support you every step of the way. Reach out to them, seek guidance, and don't hesitate to ask for help when you need it. Remember that seeking support is not a sign of weakness but a testament to your strength and determination to succeed.

AMIRAEV RUSLAN

Dean & Administration

Dean & Administration

Madina Bardibekova

Dean

Avicenna International
Medical University(AIMU)

Avicenna International Medical University aims to support and develop the leaders who improve the health of Kyrgyz and other communities worldwide. At the core of our mission is a commitment to constantly seek to improve what we do and strive to do our best. The Faculty of Medicine has recently highlighted the core values which are fundamental to our mission. It is up to each of us to support these values: service through respect, collaboration, excellence, compassion, integrity, altruism, empathy, wellness and equity. Yours Sincerely.

INFRASTRUCTURE

Infrastructure

INFORMATION ON FACILITIES AND EQUIPMENT PROVIDED FOR STUDENTS: The number and equipment of teaching facilities (lecture halls, teaching laboratories and practicums) has increased substantially since the school gained its independence and the second phase of construction of the school of Medicine and the building for clinical dental classes of Dental Medicine will further improve the situation. All teaching facilities are equipped with modern multimedia equipment with internet access. The School of Medicine has five IT classrooms with modern equipment. All class rooms are equipped with computers for students and for a teacher as well as with LCD projector. Recently equipped mobile classroom is purchased above all for the purpose of postgraduate education. It is equipped with 22 laptops with built-in wireless connectivity. The information technology classroom in the library with 16 computers is available for students from 8 to 21, which means outside their classes. Seminar room are equipped with multimedia equipment (computer and LCD projector that can also be connected to teachers' laptops). The teaching staff underwent training to learn how to use multimedia.

OUR MISSION

Mission

The INTERNATIONAL MEDICAL UNIVERSITY AVICENNA serves the needs of local and global community by educating students to become clinicians who demonstrate professionalism, practice evidence-based medicine, advocate for patients, and share highest moral and ethical standards of health care.

OUR VISION

Vision

The INTERNATIONAL MEDICAL UNIVERSITY AVICENNA will be a foremost leader of medical education in Asia. Our alumni and faculty will emerge as leaders bound to health equity and quality care for all through innovative experiences and research.

OUR Goals

Goals

- Prepare students to functional professionals in all areas of clinical interest.
- Strengthen awareness and responsiveness to the needs of local and global communities.
- Advocate for patients rights and health equity. Encourage professional involvement and leadership.
- Inspire commitment to continuous personal and professional development through innovative research.

COURSE STRUCTURE

Course Structure

There are following basic teaching methods at the university. Lecture based small group discussions and seminars, practical and laboratory works tutorials, independent study assessments, clinical training - clinical rotation (bed side teaching ward rounds).

THE FIRST, SECOND AND THIRD, YEARS; The first three years lay the foundation for an understanding of human biology its progression towards disease and subsequent medical treatment. The basic medical science curriculum ushers the student through the study of anatomy, physiology, histology, biochemistry, cell biology, microbiology, general pathology, genetics and principles of clinical medicine. Students extend their initial studies of normal human biology and function into abnormal processes and ultimate disease states. This is accomplished mainly through the studies of pathology and clinical diagnosis. Pathanatomy and Path physiology of each organ system is studied preparing the student for the upcoming clinical clerkship training, Pharmacology is also taken during the third year. In Pharmacology, students study the metabolism, fate and effect of chemical substances of clinical significance in biological systems. They also describe the action of drugs and define a framework for their use in correcting disordered function. In this year, the student acquires a fundamental clinical background applicable to any branch of medicine and begins crossing the bridge between pre-clinical medical science and the practice of medicine. Ongoing Than Gen. Surgery, Clinical Surgery, ENT, Ophthalmology, Nephrology, Orthopedics, Pediatrics, Gynecology, Dermatology As Well.

AVICENNA TEACHING HOSPITAL.

Avicenna Teaching Hospital

There are doctors & candidates of medical science participating in the training process. Combination of utilization of modern training programs, technical material base, new training technologies and qualified teachers promotes the improvement of training quality. Institutes's departments will be working out both the fundamental and applied research.

HOSPITAL PRACTICAL PRACTICE

Hospital Practical Practice

The main aim of external practical training is that the students, by taking part in daily hospital routines, become familiarized with their future professional role and develop an understanding of the importance of cooperation with colleagues and other professionals and how a hospital is organized. Avicenna Medical Faculty will increase the promotion of the clinical practical training of the doctors' curriculum. As a result, the sixth year of the medical training: 8 weeks of pre-medicine and 28 weeks of hospital medicine. The vision is to provide the students finishing medical training with better practical skills and structure of practical training as well as by specifying the study results. THE PRACTICAL TRAINING is the important component in training a doctor. the knowledge and skills. acquired during study at clinical and theoretical departments, are consulted by the students during practical training, which is held in winter and in summer. All kind of practical training are provided by the appropriate methodical materials, curriculums, list of practical skills, examples to run dairies. the annual practical training, which starts since second year of study, at senior courses the student already have such experience of practical work, which allows them orienting in clinical situations, in establishment of correct diagnosis, prescription of the corresponding treatment. The hospital practice training helps the students to adapt the future working place.

THE INTERNATIONAL MEDICAL UNIVERSITY AVICENNA

AIUA non-profit public higher education institution located in Bishkek Capital city of Kyrgyzstan. We are equipping our both campuses with infrastructure that will meet the needs of our students into the future. We are continually investing in state-of-art buildings, programs and services to maximize your learning, social, cultural and leisure experiences while at AVICENNA. AIUM Environment is bright and vibrant. We have a wonderful mix of architecturally designed building, world-class infrastructure and services across the campuses and key sites in Bishkek. World's best medical practice study process, examination quality standards and modern teaching technology are introduced here. Students have the opportunity to study under the guidance of knowledgeable professors, compared with the study of medicine at most Eurasian universities, studies at the Avicenna Faculty of Medicine is more widely integrated into clinical practice than the others. Students gain a foundation in the profession at university's clinical hospitals: at the Bishkek provincial headquarters hospital, bishkek city hospital and other hospitals associated with the faculty of medicine. Commencing from their third academic year of study, Faculty of Medicine students have the opportunity to gain a deeper knowledge of pediatrics.

"5 YEARS MBBS/MD Program MEDIUM OF INSTRUCTION IS ENGLISH". Graduates and teaching staff of the AVICENNA Faculty of Medicine work successfully in Bishkek, Kyrgyz and foreign clinics, research institutes and in international health protection organization. Due to its competitive education and liberal costs of study AVICENNA Faculty of Medicine is becoming increasingly popular among international students. It offers a full professional education programme, so that upon the completion of studies, graduates can successfully continue their education in the selected speciality's residency program or medicine field's Masters program in Kyrgyz Republic or in another country of the world.

The AVICENNA Faculty is one of the best in the entire Central Asian Region. Our faculty members are leading in their respective fields yet they are all devoted to training the next generation of Medical experts, clinicians and researchers, inspired by the founding vision of our administrator. It has a strong connection to the University Hospital, giving students opportunity for excellent training and work experience. The mission of the faculty of medicine, Avicenna is to conduct high-quality education and provide research-based under-graduation and post-graduation in medicine. The faculty physicians, dentists, psychologists and surgeons as well as Master's degree holders in various fields. The AVICENNA Medical Faculty plays a key role in the Academic session all around the year.

STUDENTS TESTIMONIALS

Students Testimonials

**Bhawana
Dadhich**

I am Bhawana Dadhich, 2nd year student pursuing from AVICENNA INTERNATIONAL MEDICAL UNIVERSITY I came new in 2021. AVICENNA provide a golden opportunity for the brilliant student's by providing scholarship to them from my self and my parents dream was to become doctor. My childhood I saw many people in pain that they was suffering from injuries, cancer and lack of doctors and hospitals. From journey of life I experienced and believed in hard work. I am interested in the branch of General Surgery.

**Udham
Singh**

I am Udham Singh, 2nd year student pursuing from AVICENNA INTERNATIONAL MEDICAL UNIVERSITY Although the quality and quantity of subjects to learn daily have been massive, most favorable part of AVICENNA that there all medical subjects taught by Indian faculties only. As well in AVICENNA we have MCI (NEXT) Exam Coaching in Campus only. We all Indian pleased to be a part of AVICENNA.

**Anjali
Sharma**

I am Anjali Sharma, 2nd year student pursuing from AVICENNA INTERNATIONAL MEDICAL UNIVERSITY It was quite tough to have better study and to better understand the medicine, I have been able to complete them by attaining deeper and deeper understanding together with like minded colleagues. Because our school offers a class instructor system by assigning a particular faculty to a certain group of students from the 1st year on, we have been in an excellent educational environment for studying under the friendly supervision of those teaching faculty.
